Skills

Programming Languages: Python, C, C++, Java, JavaScript, TypeScript, HTML/CSS, UML

Tools: Git/GitHub, MATLAB, VS Code, LaTeX, Figma, Microsoft Office (Word, Outlook, Excel, PowerPoint)

Technical Projects

Meowmino's Delivery | Java, LibGDX, Maven, Waterfall

[GitHub](#) | April 2026

- Collaborated with a team of five over four months to develop a 2D game featuring a point system, enemies, animations, and core gameplay mechanics winning the top three title of *Best Game* out of 20 groups
- Integrated Maven into the development workflow while leveraging the LibGDX framework to implement core game mechanics, rendering, and asset management
- Tested and refactored code using a Waterfall-based development cycle to ensure maintainable game functionality

Jobly | React, TypeScript, Tailwind CSS, Supabase

[GitHub](#) | January 2026

- Built features that simplify resume optimization by automatically identifying missing keywords and improving alignment with job descriptions
- Improved UI consistency and resolved front-end behavioural issues to enhance user experience
- Documented design decisions and features to support efficient team collaboration using modern SDLC practices
- Incorporated peer feedback to refine interface behavior and improve overall application usability

Leadership Experience

Computing Science Student Society

Burnaby, BC

President

May 2026 - Present

- Represent the CSSS to SFU clubs and faculty while overseeing CSSS-funded events and opportunities to ensure meaningful value for the student community
- Support the CSSS executive team by upholding society integrity, delegating responsibilities across committees, and facilitating General Meetings to keep students informed
- Coordinated outreach to SFU alumni across Silicon Valley to secure six office tours for 25 students, while leading end-to-end planning for the multi-day trip including all hotel, shuttle, and flight logistics

Director of Events

May 2025 - April 2026

- Elected by peers to oversee event planning and execute events that support the computing science student community
- Organized a hackathon for 200+ university students, creating an environment for 40+ groups of participants to create and present their projects
- Collaborated with other clubs to plan social events, communicating effectively by dividing work, making timelines and ensuring efficient teamwork throughout the planning process
- Facilitated and presented at biweekly large-group meetings for Events Committee by encouraging idea sharing for upcoming student events

Education

Simon Fraser University

September 2024 - Present

Bachelor of Applied Science in Computing Science

Burnaby, BC

Zhejiang University

May 2028 - June 2030

Master of Finance in Financial Technology

Hangzhou, Zhejiang, CN
